

Pursue endless possibilities

ENRICHMENT PROGRAMMES

SCIA Enrichment Programmes

▶ For Students Currently in Kindergarten 1 - 2

Early Childhood Literacy Boosters

Programme Synopsis

Phonics is a method of teaching reading by correlating sounds with symbols in an alphabet writing system. It is a system of relationships between letters and sounds in a language. The Early Childhood Literacy Booster Programme helps your child focus on letter and word discrimination and recognition. It will also teach your child to recognise some sight words or high frequency words. These words have unusual spelling patterns, hence cannot be sounded out using basic phonics knowledge. It is useful for beginner readers to know these words.

▶ For Students Currently in Grades 1 - 10

English Boosters (Foundation)

Programme Synopsis

This programme is intended to equip students with the fundamentals of the English Language, such as develop phonemic awareness, build vocabulary banks, learn basic grammar and harness independent reading and writing strategies. Through various formative and summative assessments, students gain feedback from the teacher which will help them become more confident users of the language and be successful in tackling English Language proficiency tests.

English Boosters (Intermediate)

Programme Synopsis

This programme is intended for students who are familiar with the fundamentals of the English Language and wish to improve further. Students will learn advanced grammar and vocabulary, and how they can incorporate it in essay writing and oral communication. Through various formative and summative assessments, students gain feedback from the teacher which will help them become more confident users of the language and be successful in tackling English Language proficiency tests.

▶ For Students Currently in Grades 1 - 10

Chinese Boosters (Foundation)

Programme Synopsis

This programme is intended to equip students with the fundamentals of the Chinese Language. The curriculum will focus on introducing the students to the auxiliary **pinyin** system and **square characters**, the Chinese Language's unique writing system. Students will build up an extensive vocabulary bank, which is essential to excel in the Chinese Language.

Chinese Boosters (Intermediate)

Programme Synopsis

This programme is intended for students who are familiar with the two fundamentals of the Chinese Language: pinyin and square characters. This curriculum will further develop the student's vocabulary bank, as well as enhance the student's competency in comprehension and composition assessments.

Math Boosters (Foundation)

Programme Synopsis

This programme is intended to equip students with the fundamentals of Mathematics. Students will learn to visualise Math using the Model Method, a systematic method of representing word problems and number relations in 'bars'. The use of bars helps students visualise the problem and know which of the four operations to perform.

Math Boosters (Intermediate)

Programme Synopsis

This programme is intended for students who are familiar with the Model Method, a systematic method of representing word problems and number relations in 'bars'. Students proficient in their foundations in mathematics, can venture further into higher-level learning.
